

SPYPOINT LINK 4G Cellular

The SPYPOINT LINK-4G trail/security camera captures 12-megapixel photos or HD videos with sound in colour by day & black-and-white by night. The camera uses 62 high-power super low glow led's for the best image quality at night along with the IR-BOOST and the BLUR REDUCTION technology settings. The curved motion sensor lens improves the detection angle and distance of its 5 detection zones. The detection range can also be adjusted up to 25 plus metres. The trigger speed of 0.07 sec is the fastest on the market.

The LINK-4G camera has the easiest activation out there because it **includes a pre activated International SIM card!** SPYPOINT has taken all the hassle out of activation for you. **Manage your account, settings and photos through the FREE app.**

FREE 30 days of unlimited photos. Visit www.spypoint.com/plans for more information on coverage and plans.

The LINK-4G features a unique GPS tracking chip (Accurate to 4 metres) and theft alert notification.

The Multi-shot mode allows up to 6 photos per detection. Photo first mode will allow for a photo to be taken just before your video that can last from 10 to 90 seconds (with sound).

Camera can be configured for a 7 day working schedule. It is also equipped with a 2.4" viewing screen. Requires 6 AA batteries or for best long term deployment option it is recommended to use an external 12 volt SLA type power supply. Supports a SD/SDHC memory card up to 32 GB. (Not included)

The LINK-4G camera works great for remote security applications.

Please Note: A mySPYPOINT.com subscription is required to access special features associated with this camera.
