

SPYPOINT SOLAR

Never buy batteries again! The SPYPOINT SOLAR trail/security camera has a built-in solar panel & rechargeable battery.

The SOLAR camera captures 12-megapixel photos or HD videos in colour by day & black-and-white by night. The camera uses high-power super low glow led's for the best image quality at night along with the IR-BOOST and the BLUR REDUCTION technology settings.

The SOLAR camera has a built-in solar panel to charge its internal battery.* SPYPOINT thought of everything but if you're still wanting a guarantee, you can simply add 6 AA batteries that you will never see the end of. The trigger speed of 0.07 sec is the fastest on the market. The curved motion sensor lens improves the detection angle and distance of its 5 detection zones. The detection range can be adjusted from 5' to 80'.

It is also possible to take photos at regular pre-set intervals with the Time lapse mode. The Multi-shot mode allows up to 6 photos per detection. Videos from 10 to 90 seconds with sound can also be recorded. Date, time, temperature (°C/°F) and moon phase can be printed on each photo. It is also equipped with a 2" viewing screen. No batteries required (6xAA optional). A removable SD/SDHC card (up to 32 GB, not included) is required to store images and video.

Main Features:

- 12 Megapixel picture quality
- Covered by SPYPOINT's two year camera warranty
- 0.07 sec trigger speed
- Integrated Solar panel with Built-in rechargeable battery
- Built-in 2" viewing screen with zoom & pan
- Ultra Compact
