

SPYPOINT FORCE-11D

The FORCE-11D has it all! Great flash range, millisecond trigger speed, viewing screen & amazing battery life.

The ultra-compact SPYPOINT FORCE-11D trail/security camera captures 11 megapixel photos or HD videos in color by day & black-and-white by night. The camera uses 42 high-power super low glow led's for the best image quality at night along with the IR-BOOST and the BLUR REDUCTION technology settings. The curved motion sensor lens improves the detection angle and distance of its 5 detection zones. The detection range can also be adjusted from 5' to 80'.

The camera has an incredible battery life (up to 12-months) when powered by good quality alkaline batteries. The trigger speed of 0.07 sec is the fastest on the market.

It is also possible to take photos at regular pre-set intervals with the Time lapse mode. The Multi-shot mode allows up to 6 photos per detection. Videos from 10 to 90 seconds with sound can also be recorded. Date, time, temperature (°C/°F) and moon phase can be printed on each photo. It is also equipped with a 2" viewing screen. Requires 6 AA batteries and a SD/SDHC memory card up to 32 GB. (Not included)

Included accessories: Quick start guide • Mounting bracket • Installation strap

Main Features:

- 11 Megapixel picture quality
- Covered by SPYPOINT's two year camera warranty
- 0.07 sec trigger speed
- Built-in 2" viewing screen with zoom & pan
- Ultra Compact: (120 x 100 x 75mm)
