

## **Miltronic's Deluxe Driveway Alert® EXT LR**

*Model: DDA2500*

**Deluxe Driveway Alert® EXT LR** has an impressive 750 metre (2,500 feet) transmission distance. It is a wireless detection and monitoring system ideal for detecting vehicles entering your driveway. Driveway Alert® is also used for monitoring entryways, pathways, sidewalks, doorways, yards, barns, gardens, garages, sheds, hallways, business entrances, stockrooms, remote areas, appurtenant structures and much more. Our Deluxe Extended Long Range systems have volume control for the alert signal and an accessory jack to add enhanced audio or visual warning indicators. The transmission distance on the EXT LR system can be extended using an accessory Yagi style booster antenna.

### **Made in USA**

#### **Key Features:**

- Operating Distance: 750 metres (2,500 ft.)
- Antenna: Rubber Ducky type with (BNC) connection
- Extended Range: Yes - via additional Yagi style booster antenna
- Sensor detection range: 10 metres (30 ft.)
- Supported Frequency: 303.8MHz
- Sensor Field of View: 40°
- Weatherproof Sensor: YES
- Receiver alert tone: Beeps upon activation (with adjustable volume control)
- Receiver - other alert: Red illuminating LED upon activation (with reset button)
- Sensor Power Supply: 9 Volt (supplied)
- Sensor Battery life: 6-months with standard Alkaline (longer if using Lithium)
- Receiver Power Supply: Mains Power - 240 volt (plug supplied)
- Sensor size: 80 x 110 x 40mm
- Receiver Size: 110 x 90 x 30mm
- Multi Sensor compatible: Yes - can use multiple sensors with single Receiver
- Receiver Auxiliary port: Yes - can add additional buzzer, counter, strobe light etc.
- Housing Colour: Green Sensor/White Receiver
- Mounting type: Steel bracket (Sensor) Free standing (Receiver)
- Country of manufacture: USA
- Warranty: 24 mths

Features: supplied complete with all mounting hardware. Easy installation directions.

Note: This Product is compliant with NZ & Australian Radio Regulations.
